Responsibilities

- Reviews patient's medical history and physician's instructions.
- Prepares equipment for procedure. Selects appropriate equipment settings.
- Explains procedure to patient and records any medical history that may be relevant to the condition being viewed. Directs the patient to move into positions that provide the best view.
- Spreads gel on the skin to aid the transmission of sound waves.
- Operates special equipment to direct nonionizing, high-frequency sound waves into areas of the patient's body. The equipment collects reflected echoes and forms an image that may be video-taped, transmitted, or photographed for interpretation and diagnosis by a physician.
- Views the screen during the scan, looking for visual cues that contrast healthy areas with unhealthy ones. Selects images to show to the physician for diagnostic purposes.
- Takes measurements, calculates values, and analyzes the results in preliminary reports for the physicians.
- Keeps patient records and adjusts/maintains equipment.
- Maintain confidentiality of sensitive information.
- Complies with safety, infection control, and quality improvement policies/procedures.

Skills, Knowledge and Abilities

- Knowledge of medical terminology, anatomy, physiology, instrumentation, basic physics, patient care, and medical ethics.
- Knowledge of mathematics and science.
- Knowledge of safety, infection control, and quality improvement practices to establish a safe work environment.
- Skill in communication and interpersonal interactions.
- Skill in performing mathematical and scientific calculations.
- Skill in gathering and analyzing patient data.
- Ability to explain technical procedures and results to patients in user-friendly manner.
- Ability to calm patients who may be nervous about the procedure.
- Ability to use correct body mechanics to assist patients appropriately.
- Ability to work independently with minimal supervision.
- Ability to multi-task efficiently and effectively.
- Ability to establish and maintain effective working relationships with patients, medical staff, management and peers.
- Ability to competently use Microsoft Office and an EMR system
